Throughout the world, market leaders of the textile industry and trade rely on the quality, design and functionality of MAWA coat hangers.

With over 500 product variations, the MAWA range has the right model for every demand. Versatile customer-specific developments make it possible to adjust individually the shape and colour.

Experienced specialists -from design to production -guarantee a maximum level of quality and flexibility. Reliability in terms of quality and delivery capacity is one reason for the high export share of over 80 percent to more than 64 countries.

MAWA GmbH was founded under the name Metallwarenfabrik Martin Wagner, or MAWA for short in Pfaffenhofen in 1948. Due to its own in-house production department and extraordinary quality standards in production and design, MAWA impresses its market partners throughout the world. Pioneering developments in the field of metal coat hangers have been developed at MAWA, as well as being protected by patents, such as the hanger clips, rotating suspension, non-slip coating. Highly-specialised and fully-automated machinery forms the core of the production department.

Selected raw materials and well-proven supply partners are the basis for precision and success. All the materials used are checked in extensive procedures for their sustainable quality and environmental compatibility.

Environmental protection is very important for MAWA.

Therefore the non-slip coating has been certificated with ECO-friendly. All wooden hangers have the European FSC certificate. Intelligent Co2 and energy-saving solutions reduce costs and make less impact on the environment.

Tailor-made solutions from one single source -globally and regionally.

Be it production, distribution, purchasing, design, innovation management or customer service. MAWA stands for absolute reliability and individual service strength.
